Skills

- Javascript | Typescript | Python | C | PostgreSQL | MySQL | MongoDB | Tensorflow | Machine Learning
- Image Classification | Drizzle | Prisma | Node | Express | React | React Native | NextJs | Gatsby | T3
- React Native Web | Redux | Redux Toolkit | Redux Saga | TailwindCSS | Styled Components | UI/UX Design
- Front-End | Back-End | Full-Stack | System Design | English | Spanish – All with professional proficiency.

Experience

Developer & UI/UX, Contract

Hubrise

10/2023 - Present

- Responsible for maintaining, improving and developing different food delivery and restaurant management related apps.

Software Developer, Contract

Carterhaugh LLC

06/2021 - 09/2022

- Developed a complex React Native app with intricate UI interactions, leveraging technologies such as RecyclerView for optimized performance and user experience.
- Integrated an external Bluetooth device into the React Native app, enabling the seamless transfer of images from the device to the app.
- Maintained the backend of the React Native app, built with Node.js and Express, ensuring efficient and secure API endpoints, database connectivity, and server-side functionality.
- Created CLI tools to streamline the configuration process for React Native web projects, allowing for fast and efficient setup of development environments and project scaffolding.

Shopify Themes, Contract

Fourthwall

07/2020 - 05/2021

- Developed custom Shopify themes using Shopify Liquid, HTML, and CSS, adhering to best practices and BEM architecture for efficient and maintainable code.
- Collaborated with designers and stakeholders to translate visual designs into functional Shopify themes, ensuring a pixel-perfect representation and optimal user experience.
- Assisted in the maintenance and optimization of existing Shopify themes, conducting code reviews, identifying and resolving bugs, and implementing performance enhancements.
- Successfully developed and deployed Shopify themes for multiple clients, meeting their unique specifications and exceeding their expectations in terms of design and functionality.

Freelance

10/2019 - 04/2020

- Develop custom website management systems for lawyers using Next.js, Node, MongoDB, Express, enabling efficient content management and website customization.
- Assisted clients in blog implementations and migrations using Gatsby
- Created multiple landing pages for service-based businesses, working closely with clients to understand their target audience and goals.

Projects

- Developed a sophisticated Monkeypox detection application integrating machine learning algorithms and artificial intelligence techniques to enhance the accuracy and efficiency of Monkeypox detection, enabling early identification of cases and timely response.

Education

Informatics Engineering

UCAB
